Note: The information in this guide applies to the latest Control4 system capabilities. Features can vary between customized installations and Control4 software releases, so contact your dealer with any questions about available features.

My Movies menu overview

For movies to appear in this menu, they need to be stored on your network as a digital video file (with a compatible media player in your system) or available on an attached disc changer.

Displays movies sorted by title

Displays your movies sorted by genre

Displays your movies sorted by actor

Displays your movies sorted by director

Displays your movies sorted by rating

Search

Search by title, genre, actors, ratings, or directors

Watching movies

Control4 makes it easier than ever to browse through and search your movie collection.

To browse for a movie:

- 1 On a Navigator's home screen, select **Watch**, then **My Movies**. A list of available movies appears.

- 2 Sort the list by title, genre, actor, director, or rating by selecting the appropriate icon along the top of the screen.

- 3 To read details about a movie, select the movie icon. The movie details screen opens, displaying (if available) length, rating, year of release, summary, cast list, and more.

To search for a movie:

- 1 Select the Search icon.  A search menu opens.

- 2 To the left of the text input field, select the field to search by (title, actor, etc.), then type your search term. A list of matching movies appears.

To watch a movie:

- 1 Select the movie thumbnail to open the movie details screen, then select the thumbnail again. Use your Control4 remote to control movie playback.

Channels menu overview

The *Channels* menu brings all of your TV, cable, and satellite channels into one location. Channels available in this menu depend on your broadcast, cable, or satellite signal provider and can be tailored to your liking. If you want only your favorite channels listed, you can edit the available channels with Composer Media Edition, or your dealer can help you. For more information, see the *Composer Media Edition User Guide* at ctrl4.co/me-ug.

Lists all available channels, regardless of source

Lists channels sorted by source

List view

Select to display all channels in a list.

Watching TV channels

Use Control4 to browse through, search for, and select TV channels. Most channel listings include their logo to help you identify them.

To browse for a channel:

- 1 On a Navigator's home screen, select **Watch**, then **Channels**.

A list of available stations appears.

- 2 Sort the list by channel number, channel source, or channel genre.
(Channel number sort shown below.)

To watch a channel:

- 1 After finding the channel in the channel list, just select the channel icon.
The channel begins playing on the associated TV.

Listen menu overview

Menu options depend on the source you're listening to—music streaming service, radio stations, or your personal audio file collection stored on your home network. Control4 gives you high-resolution album cover art and an intuitive search, sort, and playback experience regardless of the source.

The screen below is an example of the controls for your digital music collection.

Search

Search by album, artist, genre, or playlists.

Listening to digital music files

If you have your music collection stored as files on your home network or attached USB drive, you can find and play selections through the Control4 menu. Your Control4 Dealer can set up the system to find your digital music files.

To browse your digital music files:

- 1 On a Navigator's home screen, select **Listen**, then **My Music**.

A list of available albums appears.

- 2 Sort the list by album, artist, genre, or playlist. (Album sort shown below.) The music is displayed in list view by default. (Playlists have a limit of 500 songs.)

To play music:

- 1 Select an album. Album details, as well as playback controls, open.

- 2 To play the album, select Play . To shuffle the order of the tracks, select Shuffle .
- 3 For more playback options, select the options menu .

Listening to streaming audio

You can use Control4 to manage playback from any of your supported streaming music services. Your Control4 Dealer can set up the system to work with your streaming accounts.

Supported streaming services include iHeartRadio, SiriusXM, Spotify, Napster, TuneIn, Pandora, TIDAL, and Deezer.

To play streaming music:

- 1 On a Navigator's home screen, select **Listen**, then select the service you want to use. (Pandora is used in this example.)

A list of available music appears.

- 2 Select the music category or other criteria on the top and on the left (categories depend on the service being used), then select the music on the right for playback. Music similar to Pandora stations will play without further selection.

Playing music from your iOS device

Using Control4 ShairBridge™ (available on select system controllers), you can stream music from your own iOS smartphone or tablet. Even guests can stream music to your home!

To stream music from your iOS device:

- 1 Make sure your Apple device (an iOS device running iOS 8.0 or later or other devices running iTunes 12 or later) is compatible with AirPlay.
- 2 Connect your iOS device and your AirPlay device to the same WiFi or Ethernet network.
- 3 On your iOS device, swipe up from the bottom of the screen to access **Control Center**.
- 4 Tap **AirPlay**.
- 5 Tap the name of the device you want to stream content to.

To turn off ShairBridge:

- 1 On your iOS device, swipe up from the bottom of the screen to access **Control Center**.
- 2 Tap **AirPlay**.
- 3 Tap your device at the top of the *AirPlay* list.
